0. Introduction

0.1. Authors

- Philippe Négrel-Jerzy (negreljerzy.philippe@gmail.com)
- Sébastien Pont (sepont@edu.aau.at)

0.2. Context

This project is one of the assignments of the course *Fundamental Topics in Multimedia Systems* at the [Alpen-Adria-Universität Klagenfurt](#). The goal of this project is to implement a JPEG compression algorithm in Python.

0.3. Project structure

The main file is `main.py`. It contains the main function and the main loop of the program. You can call it with the following command:

```
</> Run Compressor
```

```
$ python ./main.py -r 50 ./image.png
```
